Summary

Full Stack Developer with over 3 years of experience building scalable web applications using React.js and Node.js. Skilled in API design, authentication (JWT/RBAC), and performance optimization, with a focus on delivering reliable, production-grade features in Agile environments.

Technical Skills

- **Languages:** JavaScript (ES6+), SQL, HTML5, CSS3
- **Frontend:** React.js, Next.js, Redux, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, LoopBack
- **Databases:** MongoDB, MySQL, PostgreSQL (Basic)
- **Authentication:** JWT, Role-Based Access Control (RBAC)
- **Testing:** API Testing, Manual Testing
- **Tools:** Git, GitHub, Jira, Postman
- **Cloud/Deployment:** Vercel, Netlify, Render, AWS (Basic)
- **Concepts:** API Design, OOPs, Modular Architecture, Performance Optimization, Agile

Experience

- GLA University — Full Stack Developer** Sep 2025 – Dec 2025
- Designed a real-time discussion forum supporting concurrent users and dynamic content updates.
 - Implemented secure REST APIs using JWT-based authentication and RBAC authorization.
 - Reduced API latency by 30% via query optimization and efficient schema design.
- Freelance Full Stack Developer** Mar 2025 – May 2025
- Delivered an end-to-end e-commerce platform for a small business, covering requirements through deployment.
 - Implemented product catalog, cart, admin, and order workflows using MERN stack.
- Coding Blocks — Full Stack Training + Internship** Sep 2024 – Feb 2025
- Completed structured MERN training with hands-on project development.
 - Implemented authentication flows, REST APIs, and deployment pipelines across projects.
- Yogprideal — Technical Support Engineer** Jul 2023 – May 2024
- Resolved 50+ production issues across frontend and backend systems, improving stability.
 - Reduced API response time by 20% through SQL and backend optimizations.
- Polestar Solutions — Full Stack Developer** Mar 2022 – Jun 2023
- Developed HR platform modules including user management, task workflows, and engagement features.
 - Enabled real-time data updates via API integration, reducing latency by 25–40%.
 - Improved reporting accuracy for EXL client by supporting data validation and analytics workflows.

Projects

- LMS Discussion Forum Module**
- Designed a role-based system enabling faculty to manage questionnaires mapped to courses and batches.
 - Enforced controlled student access through course and batch-level mapping.
 - Built frontend in React and backend APIs using LoopBack (Node.js) with MySQL.
- E-commerce Platform**
- Implemented a role-based system using JWT authentication and REST API architecture.
- Anaplan Internal Tool**
- Developed login, user, and task modules with API integration, improving workflow efficiency and system reliability.
- Power BI 2.0 Analytics System (EXL Client)**
- Improved dashboard accuracy by validating and reconciling enterprise datasets.

Education

- B.Tech Information Technology — Maharaja Surajmal Institute of Technology, Delhi 2019–2022
- Diploma Electronics and Communication — Aditya Institute of Technology, Delhi 2016–2019
